DFP 40453 – MOBILE APPLICATION DEVELOPMENT

PRATICAL WORK 1

LECTURER NAME :

MUNIRAH BINTI AB RAHMAN

NAME	NO MATRIC
NUR QURRATUAINI BINTI SAMAD	25DIT24F1199

Information

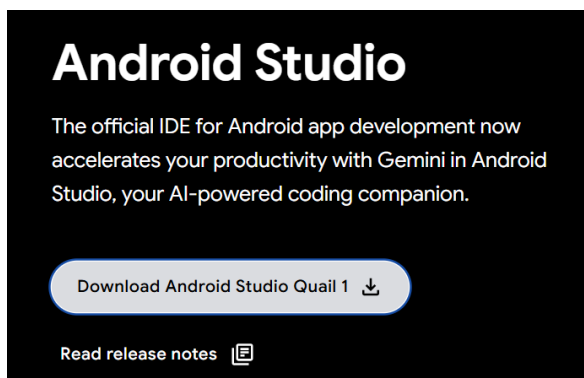

This task is to explore the Android Studio Integrated Development Environment (IDE) and identify its main components used for Android application development.

Objectives

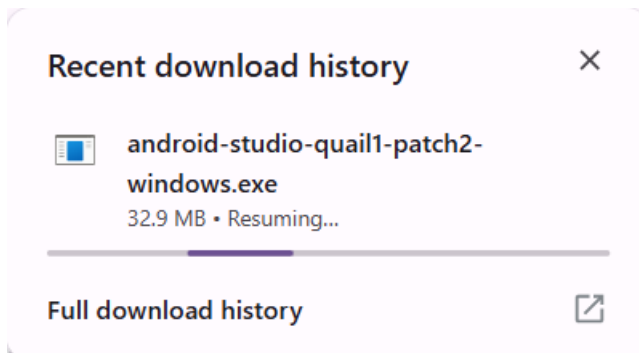

- To identify the main components of Android Studio IDE
- To understand the function of each tool in the IDE
- To explore the development environment used in Android application development

Task 1: Download And Install Android Studio

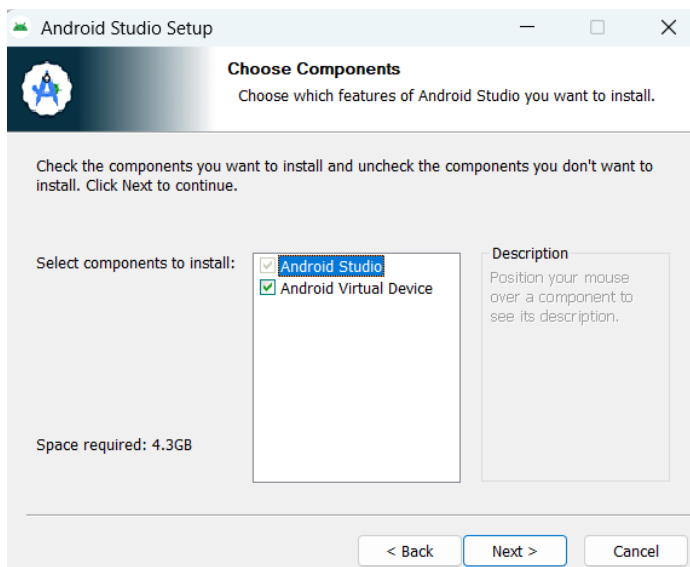

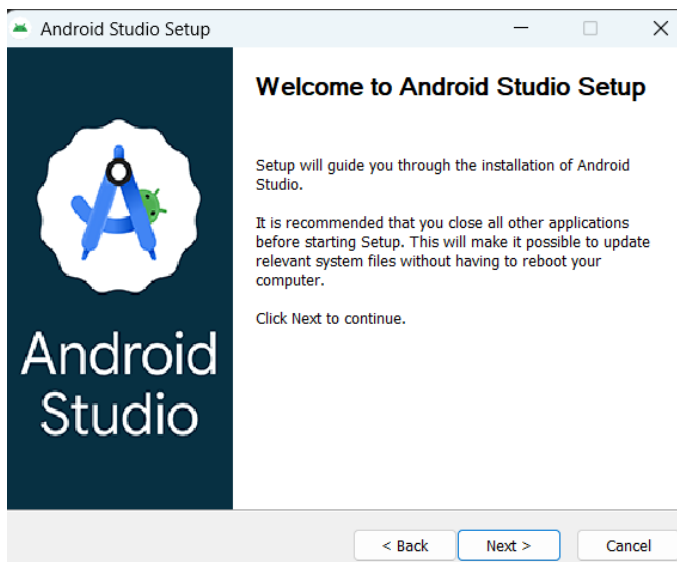

1. Download Android Studio from the official website

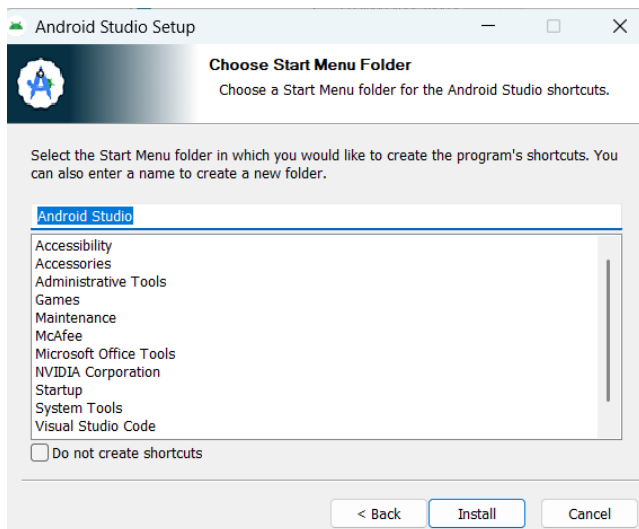

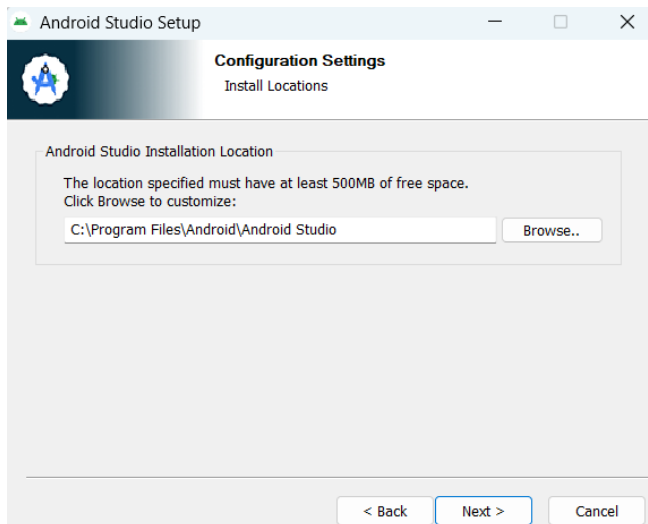

2. The Window installer files was excuted

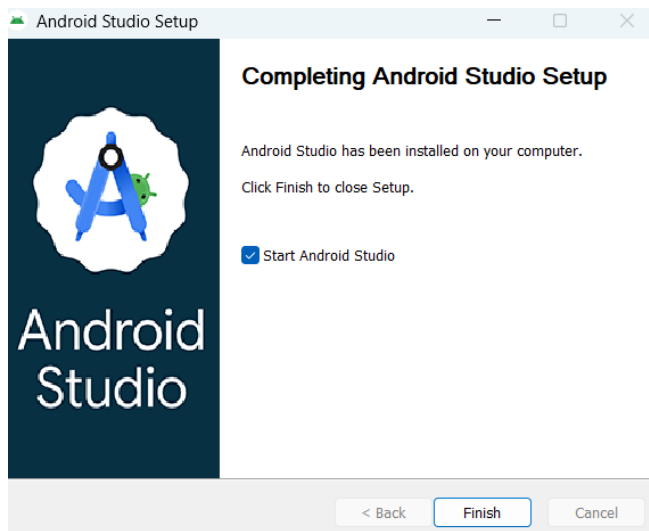

3. The installation process was completed by selecting :
➤ Next

➤ Finish

4. After installation, Android Studio was launched successfully

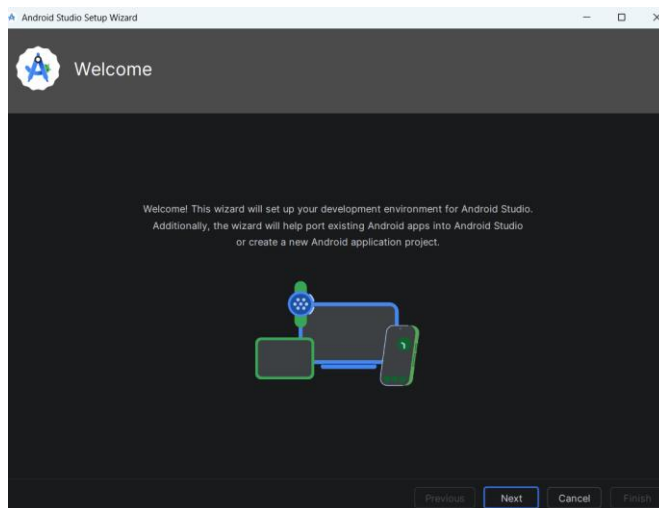

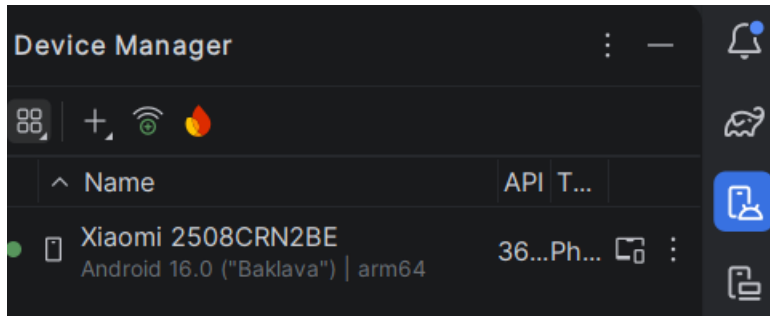

Figure 1 Andorid Studio Welcome Screen

Task 2 : Create Android Virtual Device (AVD)

1. Navigate to Device Manager
2. Click “ Create Device “
3. Select a device model
4. Choose and download the recommended system image
5. Click “ Finish “ to create the emulator

6. Start the emulator and ensure it runs successfully

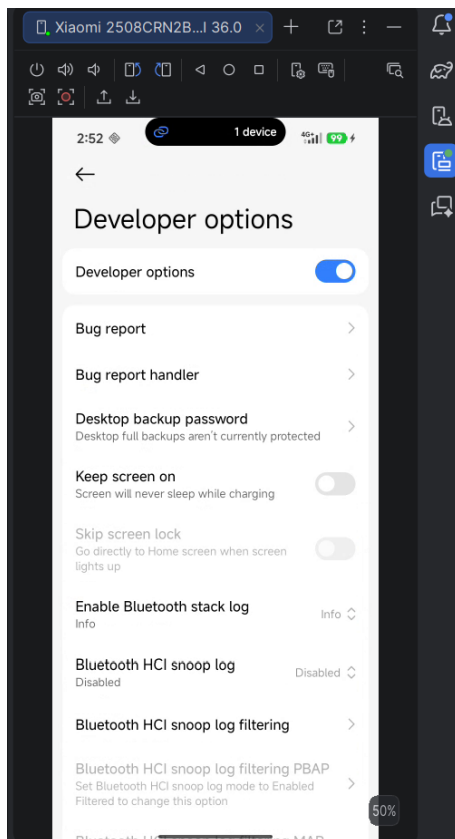

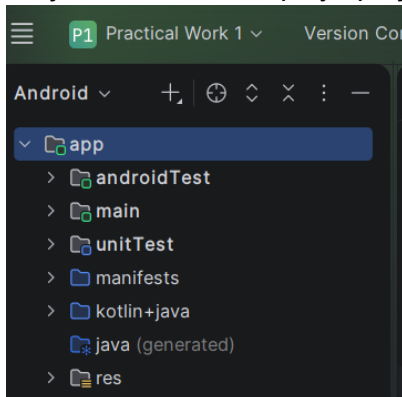

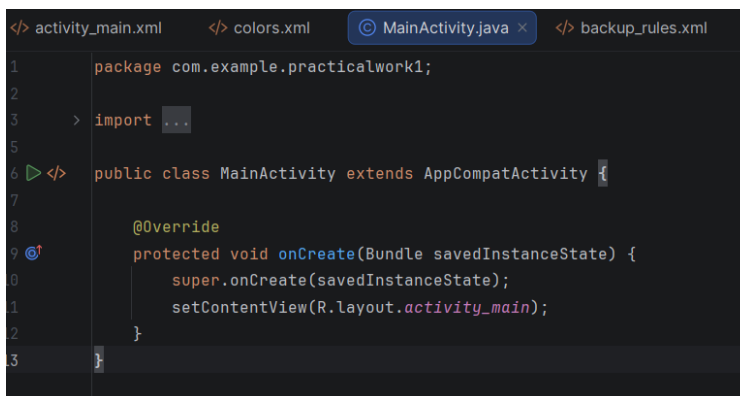

Figure 2 Android Virtual Device (Emulator)

Task 3 : Explore Android Studio IDE

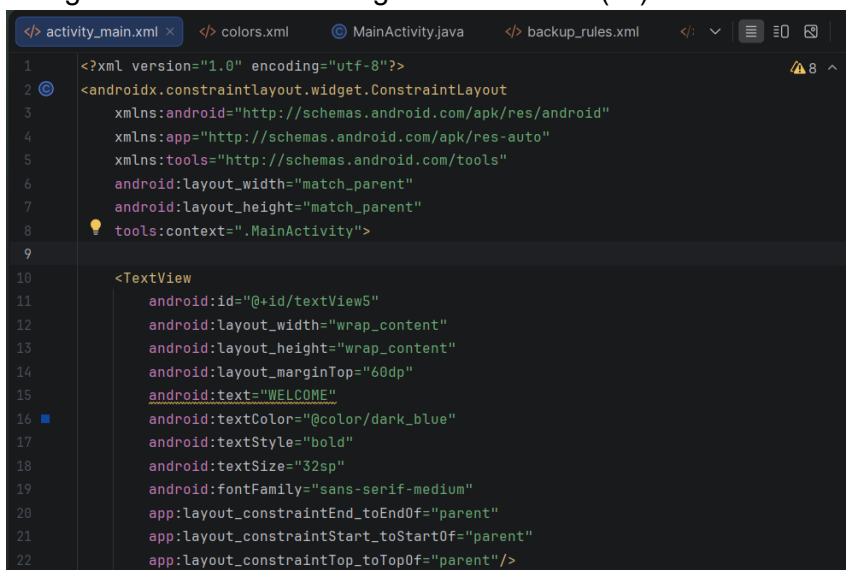

1. The following components were identified
 - Project Window – displays project structure and file

- Code Editor – used to write and edit source code

- Design Editor – used to design user interface (UI)

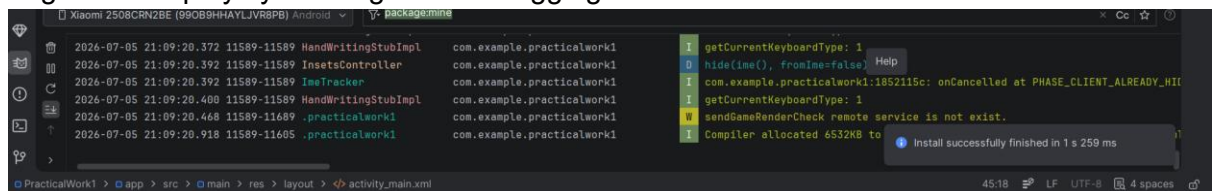

```

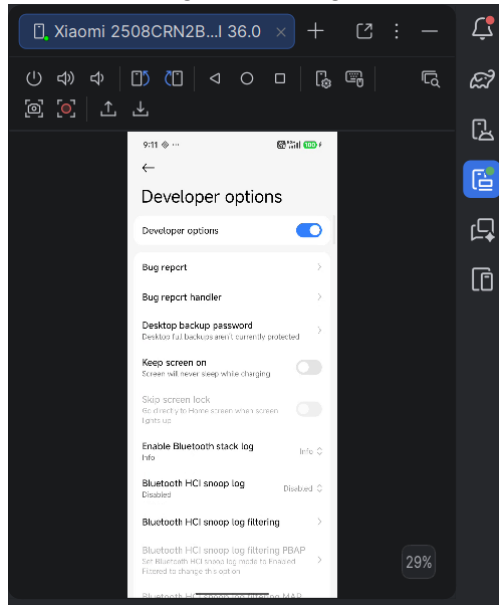

24     <CalendarView
25         android:id="@+id/calendarView"
26         android:layout_width="330dp"
27         android:layout_height="300dp"
28         android:layout_marginTop="25dp"
29         android:background="@color/white"
30         app:layout_constraintTop_toBottomOf="@id/textView5"
31         app:layout_constraintStart_toStartOf="parent"
32         app:layout_constraintEnd_toEndOf="parent"/>
33
34     <EditText
35         android:id="@+id/editTextText2"
36         android:layout_width="320dp"
37         android:layout_height="55dp"
38         android:layout_marginTop="30dp"
39         android:hint="Enter your name"
40         android:padding="15dp"
41         android:textColor="@color/black"
42         android:textColorHint="#808080"
43         android:backgroundTint="@color/light_blue"
44         app:layout_constraintTop_toBottomOf="@id/calendarView"
45         app:layout_constraintStart_toStartOf="parent"
46         app:layout_constraintEnd_toEndOf="parent"/>
47
48     <Button
49         android:id="@+id/button2"
50         android:layout_width="220dp"
51         android:layout_height="55dp"
52         android:layout_marginTop="30dp"
53         android:text="SEND"
54         android:textColor="@color/white"
55         android:textStyle="bold"
56         android:textSize="18sp"
57         android:backgroundTint="@color/blue_button"
58         app:layout_constraintTop_toBottomOf="@id/editTextText2"
59         app:layout_constraintStart_toStartOf="parent"
60         app:layout_constraintEnd_toEndOf="parent"/>
61
62 </androidx.constraintlayout.widget.ConstraintLayout>

```

➤ Logcat – display system logs and debugging information

- Device Manager – managers virtual and physical

Task 5 : Develop First Android Application

1. The interface includes :

- Calendar View

```
24 <CalendarView
25     android:id="@+id/calendarView"
```

- Test View

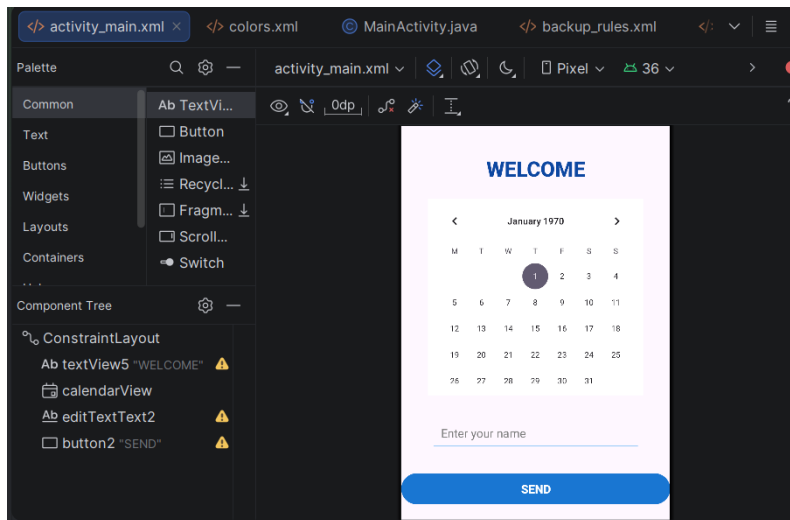

```
10 <TextView
11     android:id="@+id/textView5"
```

- EditText

```
34 <EditText
35     android:id="@+id/editTextText2"
```

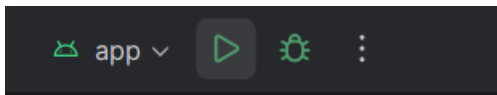

- Button

```
48 <Button
49     android:id="@+id/button2"
```

Task 6 : Run The Application

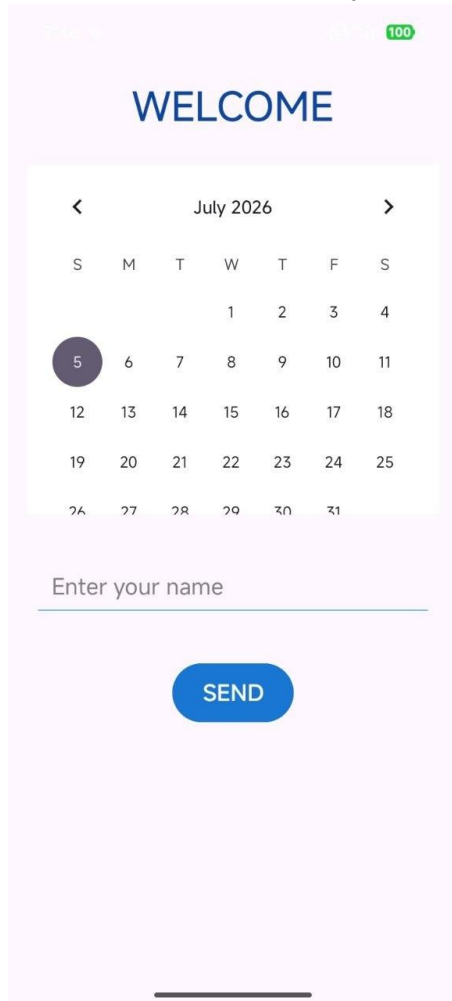

1. Click the “ Run “ button in Andorid Studio

2. The application is launched successfully

3. The app interface is displayed on the screen

Conclusion

In conclusion, Android Studio IDE consists of several important components such as Project Window, Code Editor, Design Editor, Logcat, and Device Manager. Each component plays an important role in developing and testing Android applications efficiently.
